

MUGITANI NAOHISA

SKILL

Soft skills :

- Problem solving ability
- Teamwork and collaboration
- Imajination
- Meta Cognitive

Hard skills :

- Mathematical solution

RESEARCH/ ACADEMIC INTEREST

Mathematics Education

Highschool Education

Manifold

FUN FACT

I am the Japanese.
We can support students to enter Japanese National University.

PERSONAL INTEREST

I like to watch football on TV, and to solve mathematical problems.
Travel
To learning languages, and to communicate with Malaysian more, And make a friends with Malaysians.

SUCCESS STORIES

When I was in Tohoku university, I had Malaysian, Singaporean, and Thai friends. Since then, I have been very interested in Southeast Asia.

In Japan, I have taught mathematics to high school students and supported entrance exams for many universities, including the University of Tokyo.

My goal is to support AAJ students so that they can pass the Japanese entrance exam, and to become friends with the students and PASUM staff.

Another goal of mine is research into mathematics education. How can we develop students who can solve applied mathematics problems? is my eternal theme.
